### **Election/Restrictions**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-13 and 30-36, drawn to a digital signal processor

comprising a memory controller configured to enable the excess capacity of the write buffer and inhibit write access to the excess capacity of the write buffer based on a high priority tack is being serviced or not being serviced, classified in class 711, subclass 163.

Group II. Claims 14-29, drawn to a digital signal processor comprising a memory controller configured to steer read data to the fill buffers based on priority of the fill operation, classified in class 711, subclass 158.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the invention in Group I and II has separate utility because the invention of group I has the utility for a digital signal processor comprising a memory controller configured to enable the excess capacity of the write buffer and inhibit write access to the excess capacity of the write buffer based on a high priority tack is being serviced or not being serviced, the invention of group II has the utility for a digital signal processor comprising a memory

controller configured to steer read data to the fill buffers based on priority of the fill operation. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, and because the divergent searches required for the different groups, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
